THE REPORT

OF THE

PRESIDENT OF QUEEN'S COLLEGE, GALWAY,

FOR

THE SESSION 1892-93

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY.

In accordance with the provisions of the Act of Parliament founding the Queen's Colleges, I have the honour of submitting to Your Majesty the following Report of the proceedings and condition of the Queen's College, Galway, for the Session 1892-93.

In the returns, which are furnished every year in the Appendix to the Report, detailed information will be found of the condition and working of the College in each year since it was opened for the reception of Students in 1849.

During the present Session one hundred and eight Students have been attending lectures, distributed as follows:—

In the Faculty of Arts the Students numbered	50;
In the Faculty of Medicine	41;
In Faculty of Law	8;
In the Department of Engineering	24.

(See Appendix, page 9).

I am enabled to refer with satisfaction to the position and the prospects of the Medical School. The high character of the School is generally recognized; and certain difficulties in providing Clinical instruction, with which it has hitherto had to contend, are now for the first time removed.

Just at the close of the last Session of Parliament an Act was passed, replacing the old Galway Infirmary by a Public General Hospital, open for the reception of patients from the County as well as the Town of Galway. The power of appointing the

Medical staff of the Hospital was vested in the Local Government Board, and the five Professors of the Medical Faculty of the College were appointed to that position. The Act further provides that the Hospital shall be available as a Clinical School for the Medical Students attending the College.

It would be difficult to over-estimate the importance of this Act in its bearing on the prospects of the Medical School.

But it would be a narrow and unworthy view to regard this measure merely as a means of promoting Collegiate interests, exclusive of the benefits it confers on the community at large. It places at the disposal of the public,—especially of that class who, from the nature of their employments, are perhaps more liable than any others to accidents and disease,—the services of five Physicians and Surgeons—Specialists in Anatomy, Surgery, Medicine, *Materia Medica*, and Gynaecology, respectively.

This beneficent arrangement, I may observe, adds nothing to the charges on the public purse, or to local taxation; the Professors having undertaken to discharge without salary the exacting duties of a Hospital staff.

I have to state further that the wards of the Union and Fever Hospitals are now also made available for the instruction of Students: the ample means of Clinical teaching thus secured place our Medical curriculum on the highest level of efficiency.

The Certificates of these institutions are received by the Licensing Bodies.

Some unavoidable delay has attended the organization of the new system; but it is now complete, and will be in full operation on the opening of the next College Session in October.

The anticipations which I expressed in my last Report with regard to the progress of the Engineering School have been fully realized: the number of Students this Session largely exceeds the average for many previous years. This increase is, I believe, in a great measure due to the opportunities afforded to the Students for practical instruction by the extension of railways and other works of public utility now proceeding in the West of Ireland; which, there can be no doubt, will exercise a permanent influence in advancing the prosperity of the province.

The Library and Museums are in a satisfactory condition. Though these departments cannot, as in older institutions, boast of the accumulations of learned benevolence or patriotic bounty, yet they are in many sections of their respective subjects most valuable; and by the liberality of the Legislature they are maintained year after year in a state of efficiency fully proportionate to the growing requirements of literature and science.

The Botanical Garden is improving every year: at present, it is a great advantage to the Students, and an ornament to the grounds.

I may be permitted to avail myself of this opportunity to refer to the visit recently paid to the College by Your Majesty's Representative, Lord Houghton. His Excellency was pleased to receive from the Collegiate Body an Address, which had the good fortune to elicit a reply that could not fail to be gratifying to all

who are connected with the institution. I take leave to quote the following passage from the Address :—

"This College founded to serve as a local centre of literary and scientific culture, and to bring the advantages of University education within the reach of the people of Western Ireland, claims to have given an impulse to educational progress throughout the country, and more especially to have conferred substantial benefits on the youth of this remote and outlying province; which may be seen in the number and the careers of the men who have proceeded from its various Schools of Arts, Law, Medicine, and Engineering."

His Excellency, in the course of his reply, spoke as follows :—

"You have spoken with pardonable pride of the part this institution has played in the diffusion throughout the West of Ireland of the highest forms of culture. There are two ideals, I think, at which a University may aim. It may aim at being the home of cloistered and secluded study; or it may aim at the spread of a more utilitarian form of knowledge and learning of a practical kind. The reports I have seen of the work done in this College seem to me to show that you have combined these two aims, and that you have neglected neither. Among the lists of names that I have seen in these reports are those of men who are remarkable for distinction in research and fine scholarship; and some of them, I know, are among the active teaching members of your body. On the other hand you have not neglected those practical studies which fit men for distinction in the active walks of life. I note the success with which some of your Medical students have met. I also note, with particular pleasure, the success that others have attained in the Indian Civil Service—that finest of all training grounds for the young men of England, and Ireland, and Scotland; where men can develop in the highest degree the qualities of a governing race; and whence, when they return, they exercise an influence of a most beneficial character, because they replenish our store of energy by causing the next generation to emulate their success."

Testified by Your Majesty's dutiful servant,

THOMAS W. MOFFETT, *President.*

29th June, 1893.

APPENDIX.

APPENDIX A.

I.—RETURN showing the NUMBER of STUDENTS who entered QUEEN'S COLLEGE, GALWAY, in the SESSION 1892-93.

	Matriculated.	Non-Matriculated.	Total.
Roman Catholics,	15	2	17
Presbyterians,	13	—	13
Church of Ireland.	4	—	4
Wesleyan Methodists,	—	—	—
Total, . . .	32	2	34

With regard to religious denominations, the Students are classified as they designate themselves in the forms filled up at entrance.

II.—RETURN showing the TOTAL NUMBER of STUDENTS in attendance during the SESSION 1892-93, their RELIGIOUS PERSUASIONS, and their Distribution among the FACULTIES.
